Poseidon Moves Offices to Carlsbad

Carlsbad, Calif. – Poseidon Resources announced the company has moved its West Coast headquarters from downtown San Diego to Carlsbad. The company's new address is 5780 Fleet St., Suite 140, in Carlsbad.

The move brings the company's executives closer to its proposed desalination plant in Carlsbad, which has all the necessary approvals and will begin construction upon approval of a purchase agreement for the plant's output of drinking water.

The plant would be the largest such facility in the western hemisphere and would provide about 10 percent of the San Diego region's potable water needs.

Poseidon Resources specializes in developing and financing water infrastructure projects, primarily seawater desalination and water treatment plants. These projects are implemented through innovative public-private partnerships in which private enterprise assumes the developmental and financial risks. For more information on Poseidon Resources and the Carlsbad desalination plant visit our website at www.carlsbad-desal.com.
